Summary — I am a fullstack developer, Specialized in web development. Skilled in MERN Stack with a year of hands-on experience. I'm committed to continuous learning and love building practical, user-focused solutions with standout UI/UX.

Skills

Frontend React, Next.js, TypeScript, JavaScript,
Backend Node.js, Express, MongoDB, Prisma,
Firebase, FastAPI, Railway, Postgres

Design Figma, Canva
Mobile Android App Development (Java)
Others Tailwindcss, Bootstrap, Wordpress, GSAP

Experience

AIOTAC Systems

Nov 2025 – Aug 2026

Full Stack Developer

Developing and maintaining full-stack web applications using React, Next.js, TypeScript, and JavaScript for frontend development, with Node.js, Express, FastAPI, and PostgreSQL for backend development. Working with databases and cloud technologies including MongoDB, Prisma, Firebase, and Railway.

Infinity Engineering Pvt. Ltd.

Nov 2022 – May 2023

CNC Programmer and Operator

Advanced CNC (Computer numerical control) machines programmer working in G-codes and M-Codes for both Vertical (Milling) and Horizontal (Lathe) machines.

Densire Café

Feb 2021 – Jan 2022

Senior System Operator

Managing and operating systems at Densire Café, overseeing daily operations including order processing, inventory control, and employee coordination.

Education

Fast National University Islamabad

2025

Full Stack Development (MERN)

Duration: 3 months

Virtual University of Pakistan (VU)

2025

Bachelor of Science in Computer Science

CGPA: 2.89/4

Percentage: 72.25%

Government Post Graduate College Vehari

2020

FSC(Pre-Engineering)

TRAINING & WORKSHOPS

Pakistan Boys Scouts Association (PBSA) Islamabad

(09-13 October 2023)

5-Day Scouts Training in Pakistan Boys Scouts Association (PBSA) Islamabad developed skills in leadership, teamwork, survival, first aid, and community service through hands-on activities and workshops.

Projects

➤ **Real Estate ERP System (React JS / TypeScript, Python / FastAPI)**

A full-scale ERP platform for real estate businesses covering plot management, sales/bookings, finance, HR, inventory, and recovery management. Built a 31-route Next.js frontend across 12 modules with a FastAPI backend deployed on Railway, using static export hosting and centralized API configuration.

- Built live Finance module with real-time P&L and Balance Sheet reporting, double-entry accounting, and branch-wise cost center tagging.
- Developed Sales & Bookings module with kanban-based pipeline tracking and automated ballot draw logic.
- Implemented Tax Management with bank account selection, balance validation, ledger entries, and revert flows.
- Designed server-side PDF generation (WeasyPrint) with a dedicated print-logging system for audit trails.
- Built HR features including employee DBR, daily goals, and performance tracking, with plans for biometric attendance integration via ZKTeco devices.

Technologies: Next.js, React, TypeScript, Python, FastAPI, PostgreSQL, SQLAlchemy, WeasyPrint, Railway, Hostinger.

➤ **Flozo.ai (B2B AI Workflow Automation Platform)**

Co-built a SaaS platform offering three AI-powered products — Workmate, QuotePilot, and ChatBuddy — along with a companion blog and support ticketing system.

- Designed credit-based ROI calculators for QuotePilot and ChatBuddy with tiered pricing logic and dual-cost modeling to prevent pricing cliffs.
- Architected a full support ticketing system (support.flozo.ai) using Next.js 14, Prisma, PostgreSQL/Neon, NextAuth v5, Resend, Cloudflare R2, and Upstash Redis.
- Integrated Mailchimp email automation and Google reCAPTCHA v3 across the marketing site and blog.
- Redesigned landing page sections for consistency in spacing, typography, and branding across products.

Technologies: Next.js, React, TypeScript, Prisma, PostgreSQL, NextAuth, Tailwind CSS, WordPress.

➤ **Employee Task Management Tool(REACT JS)**

Enabled admins to assign tasks to employees with detailed data and deadlines.

Allowed employees to view, negotiate, and accept or decline assigned tasks.

Facilitated task completion tracking, enabling employees to mark tasks as done.

➤ **Cloud Drive**

Drive to upload and download data from cloud.

This is a Node.js and Express-based server application that handles user authentication and routing. It uses EJS as the templating engine, supports cookie parsing, and handles both JSON and URL-encoded request bodies. The project includes: Modular routing with / and /user route groups Environment variable management via dotenv. It uses Middleware for parsing cookies and request data.

Technologies: Node.js, Express.js, EJS, dotenv, cookie-parser, and Express middleware for JSON, URL-encoded data, and modular routing.
